

OREGON COMMISSION ON AUTISM SPECTRUM DISORDER LONG-TERM VISION

April 6, 2021

Review Date: January, 2022

4.6 Comprehensive intervention standards and planning tool. There will be standards identifying a comprehensive package of ASD interventions that should be available and funded for all individuals and families based on assessed need. There will be a comprehensive checklist of common service and support needs for individuals with ASD and their families. The checklist will address both individual traits and the environmental supports an individual may need to be healthy and safe. The checklist will clearly identify (a) categories of intervention that should be provided to all individuals with ASD according to their developmental level (e.g., for social emotional development), (b) coaching and interventions for parents provided or supervised by licensed professionals, (c) blank spaces for service and support needs that are not listed but that may be required because of co-occurring conditions or other factors unique to the individual, and (d) spaces to identify which agency or provider will be responsible for the service or support. Use of the planning tool will be initiated upon diagnosis/identification and updated regularly.
